

RESEARCH THEME

Title of the doctoral research Design for a sustainable interior, with a focus on office.

Proponent professor Francesco Scullica

Abstract The research program is aimed at exploring, defining and promoting the role of Design for the sustainable interior systems, with a focus on office furniture.
The interior systems, and the office furniture industry has a relevant impact in terms of sustainability
The first objective of the research is defining a Sustainability Design-Orienting Scenario (SDOS) to open new visions on Sustainable interior systems, with a focus on office furniture, in relation to the promising model of Sustainable Product-Service System (S.PSS) and Distributed Economies. The second objective of the research is defining the advanced knowledge-base and know-how to design sustainable interior systems, and the office furniture in particular.

Keywords S.PSS design; Product Life cycle Design; Interior systems, office furniture.
